

CERTIFIED SERVICE OF SKIOLD DISC MILLS

NEW!
WITHOUT EXTRA COST
Serviced by Certified
SKIOLD Technicians

SKIOLD MAKES THE DIFFERENCE!

In order to secure optimum utilization of our key product – the SKIOLD disc mill family – we are pleased to present a team of SKIOLD technicians certified in servicing disc mills.

The certification covers:

- mechanical service
- adjustment and calibration of disc distance
- potentiometer adjustment and calibration
- disc mill controller adjustment and calibration
- test of Disc mill functionality
- feed sample and analysis
- advice on daily use and maintenance
- disc mill safety

A SKIOLD disc mill, regularly serviced by a certified technician, secures:

- minimum down time
- high quality of grinding
- optimum conditions for high performance

Service of your disc mill increases your profitability

More than 50% of the cost of producing a slaughter pig is related to the feed. By optimizing your disc mill, you obtain:

- high quality feed
- lowest cost
- best animal welfare

We guarantee you the best performance of your disc mill after having been serviced by a certified SKIOLD technician – at no extra costs!
